- visit `FortiSIEM > ANALYTICS`
  - here you can view the history of events upto 30 days (need to check), and also you can view the chart

- In `Group By and Display Fields`
  - these are the fields that can be displayed in analytics page
  - to add another field use `+` and save
  - if you saved the layout you can load it

- in search bar, you can filter by
  - `Event Keyword`
  - `Event Attribute`
  - `CMDB Attribute`

- you can combine both structured and unstructured search

- this is the menu based filter that can apply without writing this by hand

- you can also control the time range
  - `Real-time`
  - `Relative`
  - `Absolute`

- you can also save the search query and export it later. and you can load and run this
