- Dashboard
  - you will find many dashboards on the left side (check `FortiSIEM dashboard` and `Global FortiSIEM dashboard`)
  - you will get:
    - Event Rate
    - Reporting Devices
    - Performance Event Types
    - External Event Types

- CMDB
  - this is where the assets are stored and categorized in different folders
    - Devices
    - Applications
    - Users
    - Business Services
    - CMDB Reports

- Resources
  - you will have definitions of your out-of-the-box rules and your important rules

- ADMIN
  - you will have the menus for setup your collectors, your workers, your agents and also to check the health for them
  - you can also see the license
  - you can also have Content update, here we can check for update and update history
  - and in the `Settings` , you have different menus for managing your event workers, rule management

- In `Current User` activity, you can view the current user activity
